

# Transfer Factor A.I.M. PRE-LAUNCH

Transfer Factor A.I.M. is a proprietary, high-quality raw materials buffet that allows the intelligence of each cell the opportunity to design its own optimal health and physical power. Transfer Factor A.I.M. the purest of nature enveloped by the latest in science. We know the body will perform miracles by the minute when given specific raw materials.

***“Transfer Factor A.I.M. is specific, the most advanced formulation of raw materials that I know of.”***

***– Dr. Bill Hennen***

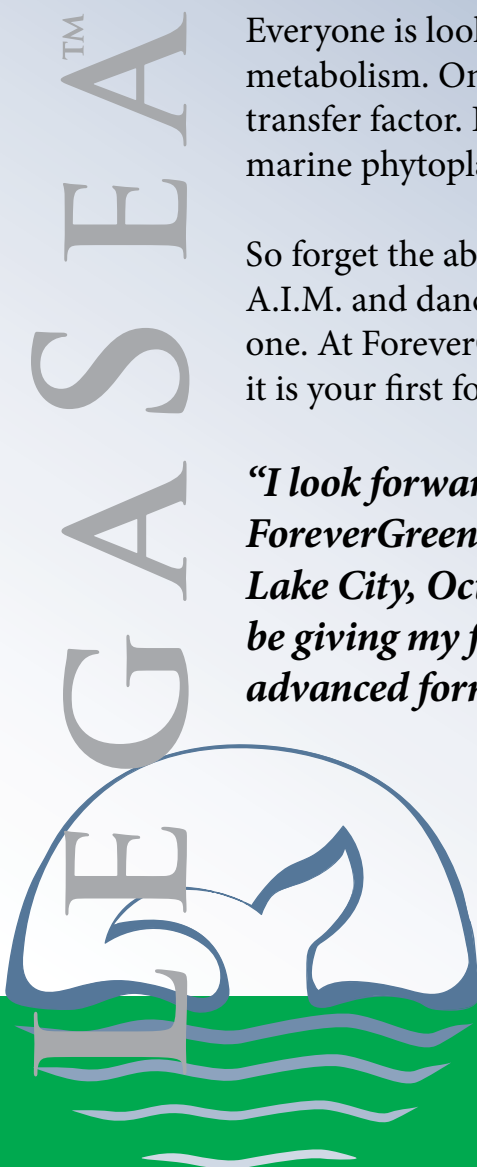

Everyone is looking to optimize immune function, anti-aging, and even their metabolism. Only a mother can begin to understand the power and protection in transfer factor. Ironically, Transfer Factor A.I.M. also features Mother Nature's Milk, marine phytoplankton, available to mankind for the first time in history.

So forget the absence of disease. Create the presence of power. Enjoy Transfer Factor A.I.M. and dance through stress. Conquer fears, and live a life, instead of survive one. At ForeverGreen, health is a habit, not an event. It is kindness; it is abundance; it is your first form of wealth.

***“I look forward to seeing all of you at the ForeverGreen ‘No Fences’ Conference in Salt Lake City, October 8 – 10. It is there that I will be giving my first formal presentation on the advanced formula of Transfer Factor A.I.M.”***

***– Dr. Bill Hennen***

# Dr. William (Bill) J. Hennen:

***“Every day we are faced with threats from our microscopic environment. What you can’t see can hurt you! The uniqueness of transfer factor is that it not only supports, but also educates our immune system in a way that no other supplement can”***

***– Dr. William J. Hennen, Ph.D.***

Dr. Hennen brings 13 years of experience as an academic researcher in drug design and development as well as 20 years as a consultant and research director in the nutritional supplement industry. Bill has spoken internationally on nutrition and disease prevention through dietary supplementation. He has extensive experience in marketing, development, education and registration and regulatory affairs both globally and domestically. Additionally, he has authored several books as well as more than 30 patents and peer-reviewed papers in bio-organic, medicinal and nutritional chemistry. Bill received his Ph.D. in bio-organic chemistry at Utah State University, Logan, Utah. Bill and his wife, Roberta, have 11 children and 21 grandchildren.

***“It is increasingly clear that as the world becomes a smaller place, with viruses and other pathogens traveling with great ease, we now face a unique situation. Simply put, we are now, and will continue to be more exposed to challenges to our health. However, nature has already provided the immune system as our defense to microbes found in our environment. The degree to which we are able to educate our immune systems to recognize invaders will help determine our ability to cope with health challenges. I urge all people to pay attention to those things that affect their immune systems.”***

***– Dr. William J. Hennen, Ph.D.***
